

M A C C E S S I N C .

Private Security LA Worldwide | PPO #122729 | BSIS-Authorized Training Provider

Officer Safety

Elective Skills Training — Counts Toward 32-Hour Requirement

Duration: 4 Hours

Authority: BPC §7583.6(b) | OSHA | Cal/OSHA

MACCESS INC.

June 2026

MODULE 1

Threat Assessment

BPC §7583.6(b) | OSHA | Cal/OSHA

Situational Awareness Levels (Cooper Color Code)

WHITE — Unaware, relaxed, unprepared: never appropriate on duty

YELLOW — Relaxed alertness: baseline for all on-duty guards

ORANGE — Focused alert: specific person or situation identified as potential threat

RED — Ready to act: threat confirmed, response initiated

Always return to Yellow after a threat resolves — avoid over-vigilance

Pre-Incident Threat Indicators

Behavioral indicators: pacing, excessive sweating, avoidance of eye contact

Physical indicators: concealed bulge, unusual clothing for weather

Environmental indicators: unfamiliar vehicle, unattended items, surveillance behavior

Verbal indicators: direct or indirect threats, statements about violence

Trust your trained instincts — document and report before a threat materializes

Contact your supervisor or 911 based on threat level — do not underreact

2

MODULE 2

Subject Contact — Safe Approach & Positioning

BPC §7583.6(b) | OSHA | Cal/OSHA

Approach Principles

Never approach a potentially hostile subject alone if backup is available

Maintain reactionary gap: 6-10 feet from unknown subject

Position at 45-degree angle — not directly in front of subject

Keep dominant hand free and available

Announce yourself clearly: 'MACCESS INC. Security — may I speak with you?'

Scan the subject's hands first — hands are where threats originate

Positioning & Cover

Cover: solid barrier that stops projectiles (car engine block, concrete wall)

Concealment: hides you from view but does not stop projectiles

Use cover whenever threat level elevates — do not expose yourself unnecessarily

Interview stance: feet shoulder-width, weight balanced, non-confrontational

Tactical L: position yourself so two guards are not aligned — reduces dual exposure

Always have an exit: never position yourself where you cannot withdraw

3

MODULE 3

Safety Awareness — Everyday Guard Safety Practices

BPC §7583.6(b) | OSHA | Cal/OSHA

Daily Safety Practices Every Guard Must Follow

Pre-shift briefing: know current threats, incidents, and persons of interest before starting patrol

Equipment check: verify radio, flashlight, PPE, and any authorized equipment before every shift

Buddy system: for high-risk contacts, always request backup before approaching

Never turn your back on an uncontrolled subject

Know the location of every first aid kit and AED at your post

Notify dispatch before and after any significant contact — do not go silent

Hydration and fatigue: impaired guards create safety risks — rest and hydrate between shifts

Personal safety extends off-duty: do not wear uniform unnecessarily in public post-shift

4

MODULE 4

Blood Borne Pathogens & Hazardous Materials

BPC §7583.6(b) | OSHA | Cal/OSHA

Blood Borne Pathogens (BBP) & Environmental Hazards

MACCESS INC. | PPO #122729 | OS |
BPC §7583.6(b)

Blood Borne Pathogen Precautions (OSHA 29 CFR 1910.1030)

BBPs include: HIV, Hepatitis B, Hepatitis C, and others — transmitted via blood or body fluids

Assume all blood and body fluids are potentially infectious

Standard precautions: gloves before any contact with blood or body fluids

Avoid touching eyes, nose, or mouth until hands are washed

If exposed: wash area immediately with soap and water, report to supervisor, seek medical evaluation

MACCESS INC. is required to provide BBP training and PPE at no cost

Environmental & Hazardous Materials

Know the location of MSDSs (Safety Data Sheets) for chemicals at your post

Do not enter a chemical spill area without proper PPE and training

Gas odor: do not use radio or electrical switches — evacuate and call 911

Suspicious substances: do not touch — isolate the area and call 911 HazMat

Cal/OSHA requires guards to report workplace hazards they observe

Document all hazardous materials incidents in your shift report

Course Complete

Officer Safety

Proceed to the online assessment. A score of 100% is required to receive your BSIS Certificate of Completion per BPC §7583.6(b) | OSHA | Cal/OSHA.
